JVCKENWOOD

Technical Justification for non-harmonized standard(s) applied

Date: July 27, 2021

Product Name: Digital Meida Receiver
Model Name: KMM-205, KMM-125, KMM-105AY, KMM-105GY, KMM-105RY, KD-X262, KD-X161, KD-X162, KD-X163, KD-X165

The non-harmonized standard(s) applied to our above product can meet the essential requirements set out in Article 3 of Radio Equipment Directive (2014/53/EU) as mentioned below:

Standard	Technical Justification
ETSI/EN 303 345-2 V1.1.1	This standard is harmonized, but assessment is conducted by Notified Body. It is because the current version of standard does not describe unwanted emission requirement, which is not appropriate. Therefore, EN 55032 test report is submitted for the assessment to satisfy the requirement.
ETSI/EN 303 345-3 V1.1.1	The radio specification of this product falls under the scope of the standard, which is sufficient to meet the requirements for the Radio Equipment Directive.
